The Philosophy

Children are the soul of a school. They have inborn zeal, energy and motivation to learn from the moment of birth. They receive an impression of the world around them through their senses. They have an absorbent mind and unique capacity to learn. They learn in two ways - unconsciously and consciously. They acquire skills rapidly and are eager to ask endless questions and show their endless thirst for knowledge. The process of learning in the elementary stage is more active than passive. The children learn through participation by being involved in a practical way. We should give them as much freedom as possible under the careful guidance because this freedom can help them develop their maximum potential.

*If you can light the spark
of curiosity in a child,
they will learn without any
further assistance.*

-Ken Robinson

Our Motto

'Vidya Patham Swarnim' - The School motto at Swarnprastha Public School depicts our perspective of life as the golden path of learning. It is deeply rooted in the ancient Indian culture of enlightenment and the guru-shishya philosophy. The School believes that students will truly shine only if each and every one of these special individual is taken and nurtured for what he/she is. We have earmarked our focus and resources to ensure that students spend the formative years of their lives in an environment conducive to learning. Learning that goes beyond the words of teachers, learning that is self-motivated and self-implemented; Learning that lasts a lifetime.
