**SWARNPRASTHA PUBLIC SCHOOL
QUARTERLY NEWSLETTER**

MESSAGE FROM THE PRINCIPAL..

**Mrs. Rashmi Grover
(Principal)**

People are not born with the sense of responsibility and it does not appear at once by a magic clasp of the fingers. Responsibility is something every person should cultivate in themselves; it should become a part of one's personality.

It is absolutely essential for us to take responsibility for our life if we wish to attain any level of success. The average among us tend to complain and blame everyone and anything as the reason they are not where they want to be, but the successful, who may have had a tougher road, chose to FIGHT BACK, chose to NEVER GIVE UP and to take full responsibility for all the circumstances that arrive.

Student responsibility occurs when students take an active role in their learning by recognizing that they are accountable for their academic success. Responsibility is demonstrated when students make choices and take actions which lead them towards their educational goals. Responsible students take ownership of their actions by exhibiting the best behaviours. We at Swarnprastha motivate our students to take responsibilities in the school, taking full control of their actions and behaviour. This helps them not only at school level but also boosts their confidence to face the world outside the four walls of school premises. They gain respect of the people and take decent place in a society and in the nation. Good wishes to the students!

With Finest Wishes

MESSAGE FROM EDITORIAL BOARD

“Failure will never overtake us if our determination to succeed is strong enough.”

Like adults, children also need a great deal of motivation to stay inspired. As parents and teachers, it is necessary that we motivate our children to encourage behaviour that is conducive to learning. Moreover, we need to ensure that every child is given an opportunity and has the liberty to excel in his or her forte.

The desire for every teacher is to see their learners excel, not only in academic work but also the outside school environment. However, we believe that among many factors that lead to achieving this, is helping and working with the students on how to develop independent learning skills.

“When a student is taught how to learn and do things on their own, it helps them develop essential social skills and development in general.”
