## MESSAGE FROM THE PRINCIPAL

*"Live every day as if it is a festival,  
Turn your life into a celebration"*

Whether it is music, rides, activities, or people watching, festivals are a great way to get outside and enjoy the day. Whatever your interests, there's a festival to match. Each day comes as a blessing to all of us. The greatness of a culture can be found in its festivals. It doesn't matter how the days are heading or the situations are, you either have plenty or you have less, celebrate with whatever you are blessed with! Life should be a ceaseless celebration.

**Life is a gift, relish it, celebrate it, explore it and dance with it. Every day is a celebration of life; every day brings in a new dawn.** Every day is special for everyone, as time and tide waits for none. A day gone can never come back. Festivals are the carriers of peace and joy in the communities. They give you a chance to celebrate the little and big things in life. They play an important role to add structure to our social lives and connect us with our families and backgrounds. When the time of festivals come, the aura changes and there is positivity all around.

Embrace each day as it comes. We all are facing everyday challenges due to pandemic but the best thing is that none of us have given up. Amidst these difficult times, festivals become an expressive way to celebrate our glorious heritage, culture and traditions. They are meant to rejoice special moments and emotions in our lives with our loved ones. We all are progressing towards our goals and destinations the way we should have been and this is commendable. Every next moment is unpredictable, and what is expected out of all of us is to be prepared for the unexpected and give our best.

In times where we all are turning a bit closer to technology it can be easy to feel waterlogged with negativity, but the reality is that, while things are bad right now, good still prevails. Undoubtedly, the rough times have made all of us stronger and I feel no challenge can prevent us from becoming better. I wish my students to have intrinsic goals and definite vision, invest their energies in expanding their creativity and focus on living an optimistic life.

We all are fighting and we all are in this together and we have to allow ourselves to smile, too. Thus, Happiness is the new rich; Inner peace is the new success; Health is the new wealth; and kindness is the new cool.

***"Cultivate an optimistic mind, use your imagination, always consider alternatives, and dare to believe that you can make possible what others think is impossible."***

With blessings and grace

## MESSAGE FROM THE SENIOR HEADMISTRESS

*"It's not about making the right choice.  
It's about making a choice and making it at right time."*

Dear Students

Do you want to know who you are? Don't ask. ACT! Action will delineate and define you. The quality of our life and destiny are directly connected with our decisions. Success or failure in our life is the result of the actions initiated by us. These actions and decisions shape our destiny. Every choice that is made in our present moment has an impact on our future. Many of us grow up and are not clear what we have to do with our lives.

**Mrs. Swati Rana**  
**(Headmistress Senior Wing)**

My Dear Students! Realize your strengths and weaknesses and most importantly your passion at right time. Neither your teacher nor your parents can determine your future. It is your own decision and that single decision in your life is the key to your future happiness. Be wise, work hard and believe in yourselves and just see the amazing results which you get.

To be successful, you have to use each day as an opportunity to improve, to be better, and to get a little bit closer to your goals. Push yourself because no one else is going to do it for you.

Remember students, lack of ability to make a decision in a timely manner causes most people to fail in their lives. Identify this challenge and decide to no longer let it be a setback to your success.

From now on DECIDE to make conscious decisions! Powerful decisions every day!  
Set the standard, and continue to raise the bar in your life!

Stay safe! Stay happy!

All the Best!

Swati Rana

## MESSAGE FROM THE EDITOR

### BOOST YOUR EMOTIONAL HEALTH

*You cannot control everything. Sometimes you just need to relax and have faith that things will work out. Let go off a little and just let life happen.*

**Mrs. Indu Bansal  
(TGT English)**

Having good emotional health is a fundamental aspect of fostering resilience, self-awareness, and overall contentment. Let us keep in mind that having good emotional health doesn't mean you're always happy or free from negative emotions. It's about having the skills and resources to manage the ups and downs of day-to-day life.

Emotions can and sometimes will get the best of you, but learning coping strategies to temper them can help you respond instead of reacting to upsetting situations. If you're overwhelmed with any kind of stress, taking time for physical activity can nourish both your emotional and your physical health. Staying connected with loved ones can provide a buffer when you're going through challenges.

Foster these connections by spending time with close friends and family, either in person or over the phone. During these tough times, as we are restrained to the four walls and feel afraid to move out often, our busy routines will definitely work wonders.

Our feelings can affect how we handle situations and the way we run our lives. The negative voice that nags us can really take a toll when goes unchecked. Therefore keep your positive aura alive forever and stay in the best of everything.

With the best of wishes!

Indu Bansal

## Message from the Editorial Board...

*"Remember being happy doesn't mean you have it all. It simply means you're thankful for all you have."*

Online learning has been a boon in the time of pandemic. In these testing circumstances due to impromptu closure, the biggest benefactors and the blessing in disguise are the online learning platforms. Also known as eLearning this online learning method has catered to the growing demands of the students in the most efficient manner. The major advantage that online learning has is its flexibility. Student can learn from anywhere in the world at his/her convenience.

Look at the broader perspective of this platform. Had it been not there, what would the students around the world have done? All the learning would have come to a standstill. Academics would have taken a backseat. Therefore, use this opportunity to its best. And yes, although we cannot compare it to the regular school scenario, yet we can squeeze the last bit of benefit out of it.

"Today is the opportunity to build the tomorrow you want." So, realise the significance of this online learning platform and use it to learn the maximum till the life becomes normal again.
